Asure ID® EXCHANGE
Card Personalization Software

ASURE ID® 7 IS HERE.

- **Friendly and Intuitive Interface** – Enhanced user experience makes photo ID card design and data entry a breeze.

- **Choose Your Source** – Easily print cards from records stored in Asure ID's internal database. Or with our real-time data exchange feature Live Link, you can share across multiple workstations directly from your network's HR, security or ERP database, adding Oracle, MySQL, LDAP and DVTel support.

- **iDIRECTOR®** – Designed for the most sophisticated secure credential applications, you can improve smart card development and deployment with this encoding module. iDIRECTOR manages card memory, loads multiple smart card applications, and graphically personalizes the card in one seamless process.

Tools at your fingertips

- Multi-task with tabbed navigation, and effortlessly switch between card design and data entry, managing each independently.

- The toolbar puts frequently used elements into logical order.

- De-clutter the workspace by hiding colors and attributes until they're needed, using pop-out control palettes.

- "What You See Is What You Get" display helps ensure accurate card design by showing exactly how a card will print, including data place-holders.

Productivity has never looked better.
Asure ID® offers much more than good looks, it provides a dramatic speed boost. Everything you need to design and populate a card is right in front of you in a crisp, clean environment that allows the user to glide from data entry to card design to printing and reporting.

Everyday work made effortless.
Routine tasks can be performed with a couple of mouse clicks. It's a snap to capture or load a photo, void a card or set the print counter. And you can populate card data fields directly from the internal Microsoft® Access® database. These and other frequently-used features are within easy reach on the Microsoft "ribbon"-inspired toolbar.

Standard features:
Asure ID "remembers" with automatic startup loading of the last template and report used.

Quick Filter wildcard search on any field in the database. Global Find extends this convenience across all linked databases and templates.

Asure ID Exchange features:
iCLASS® SE open encoder platform support for end-to-end security, control, and flexibility of your physical access control solution (PACS) credentials. Issuance to a FARGO® card printer

with an embedded iCLASS SE encoder allows you to create, encode (read/write), and manage PACS credentials on-site, streamlining your ordering, inventory management, and issuance processes.

Laser Configuration Module features an Intuitive interface that manages data and visual security elements to be printed, encoded and engraved into credentials -- in one unified card template.

Customized Reporting Securely Delivered
In addition to standard ready-to-view reports, manipulating data with filtering, sorting and grouping has never been easier, and configuring and saving it in a custom report is simple. And with definable reporting privileges extended to application-wide password protection, Asure ID Exchange enhances your ID data security.

Simply intuitive.
For all its power and complexity, the most surprising part of Asure ID is its intuitive nature. Tools and processes have been so carefully designed that it seems to anticipate what you need next.

Asure ID takes ID card personalization to the next level by making users more productive. Ask your HID Global dealer. Or visit **hidglobal.com/idsoftware.**

ASURE ID® MEETS THE CARD APPLICATION NEEDS OF:

- Large Corporate ID
- National ID
- Driver's Licenses
- Government/ Military
- State & Local Government
- Healthcare
- Universities
- Events

Supports Windows 8 Pro Tablets

HID GLOBAL IS THE LEADER IN SOLUTIONS FOR THE DELIVERY OF SECURE IDENTITY.

Asure ID is just one part of a complete, integrated system for the issuance, management and authentication of secure IDs. Your HID Global dealer can custom design a secure identity system using proven HID components including:

- FARGO® ID Card Printer/Encoders
- Cards, ribbons, films and overlaminates
- ID card production services
- HID contact and contactless card readers, including iCLASS® smart card readers

The suggested minimal system requirements for Asure ID 7 are:

- 1 gigahertz (GHz) or faster processor
- 1 gigabyte (GB) RAM
- 1 GB available hard disk space
